Notes for the FAOSTAT domain on population

The FAOSTAT Population module contains time series data on population, including urban/rural, labour force, agricultural and economically active population. The series consist of both estimates and projections for different periods as available from the original sources, namely:

1. Population data refers to the World Population Prospects: The 2010 Revision from the UN Population Division.
2. Urban/rural population data refers to the World Urbanization Prospects: The 2009 Revision from the UN Population Division. *Long term series estimates and projections from 1961 to 2050.*
3. Economically active population from the ILO and the data refers to the 5th edition, revision 2008. *Long term series estimates and projections from 1980 to 2020.*

General disclaimer

The designations employed and the presentation of materials in FAOSTAT do not imply the expression of any opinion whatsoever on the part of the Food and Agriculture Organization of the United Nations concerning the legal status of any country, territory, city or area or its authorities, or concerning the delimitation of its frontiers or boundaries.

Where the designation "country" or "area" appears on this internet site, it covers countries, territories or areas.
