The Sixth Assessment cycle is the most ambitious one in the history of the IPCC, with three Special Reports (the recently approved Special Report on Global Warming of 1.5 °C, a Special Report on the Ocean and Cryosphere in a Changing Climate and a Special Report on Climate Change and Land), the 2019 Refinement to the 2006 IPCC Guidelines for National Greenhouse Gas Inventories, as well as three Working Group contributions and a synthesis report to the Sixth Assessment Report.

The event showcases the two IPCC Special Reports that will be launched in 2019.
